REQUEST FOR DATA

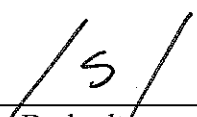

Date issued: May 17, 2011

The Department of Energy (DOE or the Department) has received a complaint regarding B&K Mueller Industries Inc. (B&K) faucet model number 120-003NL. The complaint alleges that testing of this model demonstrated that the faucet exceeds the federal maximum allowable water flow rate.

In accordance with 10 C.F.R. § 429.106, the Department requests that B&K submit any water efficiency test data, including complete test reports, for model 120-003NL to David Case of my staff at David.Case@hq.doe.gov no later than June 17, 2011. If B&K has information that this model has been certified as compliant to the Department by a third party, please provide the name of the party that submitted the certification report and the model number under which it was certified.

Companies are prohibited from distributing in commerce any covered product not in compliance with the applicable DOE conservation standard. Any person who knowingly violates this provision may be subject to fines of up to \$200 per violation, i.e., per product distributed in the United States. 42 U.S.C. § 6303.
